A-Frame

Hard-working and simple, this aesthetic design is sure to meet many needs. Add an overhead door for a versatile garage that can park your vehicles, lawn and garden equipment, ATV's and more. Keep it all out of the weather!

The A-Frame also comes in the *Economy* version. These buildings are the same as the A-Frame except that they have 6'4" walls, the studs and rafters are spaced at 2' on-center, and no windows are included. All additional options are available in both versions.

Lofted Barn

If you are looking for a shed that has that rural hip roof look but fits right into any residential setting, this building is for you.

The sturdy loft above the porch* is excellent for storing those prized possessions you just might need some day, hiding your wife's birthday present until that special day, or just relaxing for a snooze on a rainy afternoon with the steady drum of the rain on the durable metal roof over your head.

Garden shed? Stamp collection gallery? Studio? You name it.

The 18 inch overhang outside the front door is nice when the sun or the rain beats down. Hang a wind-chime from it, and any task will suddenly become lighter.

Ask your delivery man to carefully place your shed in that spot that's been waiting. The spot with the beautiful view over the lake. Then don't forget to schedule breaks for just looking out the double pane 24x36 inch window* at the view below. The 8 inch overhang on the back side will help get the water away from the building and keep the painted wooden siding solid and waterproof for many "looks" to come.
